

JISHNU VARDHAN KANCHARLA

Aspiring DevOps Engineer & Data Scientist

+91 8374517704 | jishnuvardhan558@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Vijayawada, India

PROFESSIONAL SUMMARY

Detail-oriented and results-driven aspiring DevOps Engineer and Data Scientist, currently pursuing M.Tech in Computer Science with a strong academic record (CGPA 8.4). Hands-on internship experience across Python development, deep learning, and cloud-native technologies, including CI/CD pipeline design, Kubernetes orchestration, Docker containerization, and AWS cloud services. Proven ability to build and deploy machine learning models (ANN, TensorFlow/Keras) for real-world applications such as air quality prediction, and to design automation frameworks that streamline DevOps workflows. Strong foundation in Python, Flask web development, data analysis (Pandas, NumPy), and security-integrated CI/CD (DevSecOps). Committed to continuous learning through industry certifications, with a career goal of delivering scalable, high-impact DevOps and data science solutions in fast-paced, cloud-first environments.

CORE COMPETENCIES

DevOps & CI/CD | Kubernetes & Docker | Cloud Computing (AWS) | Python Programming | Machine Learning & Deep Learning | Artificial Neural Networks (ANN) | Flask Web Development | Data Analysis (Pandas, NumPy) | DevSecOps & Automation | Version Control & GitHub Actions | Linux & Scripting | Agile Collaboration | Problem Solving | Stakeholder Communication

TECHNICAL SKILLS

Programming Languages: Python, C, SQL

Frameworks & Libraries: Flask, TensorFlow, Keras, Pandas, NumPy

DevOps & Cloud Tools: Kubernetes (Namespaces, Orchestration), Docker, GitHub Actions (CI/CD), AWS Cloud Foundations, Git

AI & Data Science: Artificial Intelligence, Deep Learning, Artificial Neural Networks (ANN), Generative AI, Prompt Engineering

Platforms & Tools: Linux, Jupyter Notebook, VS Code, Cloud-Native Tools, Snyk (Security Scanning)

Professional Skills: Team Collaboration, Communication, Time Management, Adaptability, Continuous Learning

INTERNSHIP EXPERIENCE

DevOps Intern

Aug 2025

Code Alpha

Remote

- Executed hands-on DevOps workflows, including Kubernetes namespace configuration and CI/CD pipeline design, to support reliable, repeatable deployments.
- Strengthened automation and deployment practices by working directly with cloud-native tools in a production-style environment.
- Collaborated with mentors on containerized deployments, building practical proficiency in Docker-based infrastructure.

Technologies Used: Kubernetes, Docker, CI/CD, Cloud-Native Tools

Python with Deep Learning Intern

Jun 2025

VLX IT Solutions

Remote

- Designed, trained, and evaluated Artificial Neural Network (ANN) models for an AQI (Air Quality Index) prediction use case.
- Performed data cleaning, preprocessing, and feature preparation on real-world datasets to improve model accuracy and reliability.
- Applied deep learning concepts to a practical environmental analytics problem, translating theory into a working solution.

Technologies Used: Python, TensorFlow, Keras, Pandas, NumPy

Python with AI Intern

May 2025 – Jul 2025

VLX IT Solutions

Remote

- Applied Python programming to AI-focused development tasks as part of a structured summer internship program.
- Built end-to-end familiarity with machine learning workflows, from data handling and model training to evaluation.
- Improved coding efficiency and adherence to best practices through iterative, project-based learning.

Technologies Used: Python, Machine Learning, Jupyter Notebook

PROJECTS

Hybrid Cloud LLM Gateway2026

Engineered a gateway architecture connecting large language models (LLMs) to hybrid cloud environments to enable scalable, flexible inference.

- Enabled flexible deployment of AI models across hybrid cloud setups, demonstrating strong cloud-native and AI integration capability.

Technologies Used: Kubernetes, Docker, Cloud APIs (AWS/Azure), Python

DevSecOps Orchestrator2026

Designed a DevSecOps pipeline orchestrator that embeds automated security checks directly into CI/CD workflows.

- Automated secure deployments and improved compliance posture, demonstrating applied knowledge of DevSecOps best practices.

Technologies Used: GitHub Actions, Kubernetes, Docker, Snyk

DevOps Autopilot2026

Built an automation framework to streamline core DevOps tasks, including container deployment, monitoring, and scaling.

- Reduced manual effort and improved deployment speed, reinforcing hands-on DevOps automation expertise.

Technologies Used: Python, Kubernetes, Docker, CI/CD Tools

AI Resume Builder2025

Designed an AI-powered system that generates professional, ATS-friendly resumes from structured user input.

- Automated resume creation and personalization, delivering a portfolio-ready, production-style application.

Technologies Used: Python, NLP Models, Flask, AI APIs

AI CyberSuit2025

Developed a conceptual cybersecurity suite integrating AI-driven threat detection and anomaly monitoring.

- Strengthened understanding of AI-driven security practices and demonstrated the ability to integrate ML into cybersecurity workflows.

Technologies Used: Python, Machine Learning, Security APIs, Cloud Deployment

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering – Data ScienceExpected Jun 2027
RK College of Engineering, VijayawadaCGPA: 8.4 / 10

Intermediate (MPC)2021 – 2023
Narayana Junior College73.2%

SSC (10th Grade)2020 – 2021
Sri Chaitanya Techno School590 / 600

CERTIFICATIONS

- AWS Cloud Foundations – Amazon Web Services (2026)
- Professional Certificate in DevOps – CI/CD Pipelines, Kubernetes, Docker, Automation (2026)
- Professional Certificate in Generative AI – GenAI Applications, Prompt Engineering, LLM Integration (2026)
- Python with Deep Learning Internship Certificate – VLX IT Solutions (2026)
- DevOps Internship Certificate – Code Alpha (2026)
- Python with AI Internship Certificate – VLX IT Solutions (2025)

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Class Leader, RK College of Engineering – Led and coordinated class activities, representing peers in academic and administrative matters.
- Academic Excellence – Ranked first in class with a CGPA of 8.4, reflecting consistent discipline and strong performance.

ADDITIONAL INFORMATION

Languages: Telugu (Native), English (Fluent), Hindi (Working Proficiency)
Preferred Locations: Hyderabad, Bangalore, Dubai
Interests: Cloud-native technologies, GenAI application development, fintech & digital banking innovation, continuous learning (LinkedIn Learning)
